CMPU-145 - Comment #1: Anna's teaching/lecture style is effective and fun. Enough resources were provided for review, and she was available outside of class.

year: Jan 12th, 2025

CMPU-145 - Comment #2: Professor Gommerstadt is a really engaging lecturer, and is really good at preempting and expanding on questions asked of her. She also just seems excited about all her material, which makes talking to her outside of class very easy. I would highly recommend taking a class with her if given the opportunity.

year: May 9th, 2024

CMPU-145 - Comment #3: Only take this class if you really have a passion for computer science. It is a lot of work both inside and outside the classroom and you will easily fall behind if you don't pay attention. Professor Gommerstadt is really sweet but also a hard grader and will nit-pick your assignments to the very last detail.

year: Apr 29th, 2024

CMPU-145- Comment #4: Fantastic lecturer, very approachable inside and out of class, explains concepts very well. The workload is pretty light and consistent. It's very clear what will and won't be on tests. Gommerstadt is infectuously enthusiastic for the material.

year: Jan 20th, 2024

CMPU-145- Comment #5: Had her for both 102 and 145, and she gives very engaging lectures, and she's very personable and passionate about what she's teaching. Couldn't recommend taking a CS class more
