CMPU-102 - Comment #1 : He tends to go on tangents but he taught each topic relatively clearly and left plenty of opportunities for questions. The homework was do-able and he was pretty available outside of class. His feedback wasn't always super clear on graded hw assignments, but he is a nice person and very understanding.

CMPU-102 - Comment #2 : Peter is an amazing human being. He always came to class trying to make us laugh. I would love to have him as a friend, a mentor, or really anything...other than a teacher. He is unfortunately not a good professor. He tries, but it's just not for him. Be prepared to teach yourself the material and rely on the coaches heavily.

CMPU-102 - Comment #3 : Peter is an amazing guy. He is very hard working and very accessible outside of class. However... his lectures are pretty hard to understand, because he rarely shows syntax for what he explains. Also, sometimes the homework that he assigns is tricky to understand (because of the wording). Nothing a visit to office hours or email can't fix though!

CMPU-102 - Comment #4 : Lemieszewski is very friendly, accessible inside and outside of class, and funny. However, his lectures were difficult to follow and frequently veered off topic, or missed important points. The hardest part of labs and homework was figuring out what the instructions meant. However, the readings he assigns explain the material clearly.

CMPU-102 - Comment #5: Very helpful outside of class but be prepared to do extra learning on your own

CMPU102 - Comment #6: Very little homework. Easy grader. Absolutely useless lectures.

CMPU102 - Comment #7 : Pete is a super nice and accessible professor. But he is definitely not good at explaining things. I spent a lot of time outside the class to study the materials. Anyway I still recommend Pete because he really want everyone in this class to success. So as long as you try, you will get a good grade in his class.

CMPU-102 - Comment #8 : lowkey disorganized and his classes started off pretty rough. but he's super kind and helpful. really helpful on the tough homeworks and always makes time for you

CMPU-102 - Comment #9 : Not helpful at all

CMPU-102 - Comment #10 : You will be teaching yourself. All he does is an unprepared reading of a slide he didn't make. He'll answer any question, but it's hard to know what to ask when you are given such a shallow presentation. Really nice guy, but doesn't seem to care about teaching or simply doesn't understand what teaching entails.
